ABOUT ME

I am an Information Technology professional with hands-on experience in QA testing, web development, POS and inventory systems, and UI/UX design. During my OJT, I gained practical experience testing web applications, identifying bugs, assisting with POS and cashier operations, and suggesting improvements to system usability. I have also developed academic and personal projects such as POS, inventory, reservation, and web/mobile applications using Laravel, React, TypeScript, PHP, JavaScript, and MariaDB. I am a fast learner, detail-oriented, and enjoy solving problems, learning new technologies, and working with teams to build reliable and user-friendly systems.

Tech stack

Java Script | HTML | TypeScript | React | Tailwind CSS | Trello | PHP | Laravel | MySQL | Capcut | Figma | PlayWrite | Canva | Git | Github | Digital Marketing

WORK EXPERIENCE

Akrana POS & Inventory System — QA Testing Intern | 2026

- Performed manual QA testing for Sales, Inventory, POS, Admin, and Warehouse modules.
- Created Playwright tests for regression and workflow testing.
- Identified and documented bugs, UI issues, and workflow problems.
- Assisted cashiers with POS operations and troubleshooting.
- Suggested UI/UX improvements and participated in system development meetings.
- Used Trello for task and issue tracking; assisted with marketing and social media video content.

Freelance / Web Developer —Personal & Academic Projects | 2022 – Present

- Developed POS, Inventory, Reservation, and Web/Mobile Systems for academic and personal projects.
- Designed responsive UI/UX and system workflows based on project requirements.
- Developed applications using my stack.
- Used Git/GitHub for version control and project management.

PROJECTS

OCT Pharmacy Sales & Inventory System
Capstone project featuring POS transactions, barcode scanning, FEFO/FIFO inventory management, supplier management, and inventory tracking**.**

Shoes POS System with Mobile Application
Developed a POS and inventory system for shoe products with mobile support for sales and inventory management.

Cinderella Hotel Reservation System
Developed a hotel reservation system with room booking, guest management, check-in/check-out, room availability, and payment management.
